

KULAM PROJECT

Bringing people together through music, connection & shared experience

Kulam is an international collective creating musical and transformative experiences that support connection, healing and conscious living.

Live music is at the heart of Kulam. Musicians and participants create each experience together, in the moment - a shared journey shaped by live voices, instruments and the connection between everyone present.

Kulam constantly hosts singers, medicine musicians and guest artists within its projects, bringing different voices, traditions and musical backgrounds together.

At the heart of Kulam is the belief that music, movement, voice and shared experience can create spaces for connection, expression, presence and healing.

Live Ecstatic Orchestra

A UNIQUE ENSEMBLE. MUSIC
CREATED LIVE.

A 100% live ecstatic dance journey led by Nir Shraiber.

For every event, Kulam creates a unique ensemble from carefully selected local musicians, guest artists and musicians already performing at the festival.

No computers. No electronic tracks. No pre-recorded music.

Everything is created live - in the moment - responding to the dancers, the musicians and the energy in the space.

Ecstatic Singing Circle

VOICE. MOVEMENT. CONNECTION.

A shared journey that brings together the freedom of Ecstatic Dance and the connection of a Singing Circle.

Live musicians, guest singers and singing circle leaders guide the experience. Each song is supported by the live band, building an ecstatic wave of voice, rhythm and movement.

No musical experience is needed. Come to listen, sing and let your body move with the circle.

One voice becomes many. Many voices become one.

- Before, on the day of, or after an event

THE TRIBAL EXPERIMENT

A somatic journey into our primal roots through rhythm, sound and movement. Instinctive expression and collective exploration invite connection, belonging and shared humanity.

The Kulam Journey

FROM PRESENCE TO UNITY

Voices, percussion and acoustic instruments from different cultures meet and blend. Musicians create and respond in real time to the people, the movement and the moment.
